Extended Components are LAZARUS and DELPHI components.

The Extended Components are part of a [Very Rapid Applications](#) Development [framework](#).

There are most visual components in the package. The color change when we focus on them. They are :

- ▶ A data list linked to data with its N-1, N-N, N-N-N relations-ships extension
- ▶ Saving edits into INI file ([Video](#))
- ▶ A label which can be set to the edits, to be colored on focus on edit
- ▶ Some number's edits
- ▶ Some color's edits
- ▶ Some data dates
- ▶ Some data text, with formatting of text
- ▶ Some data Memo
- ▶ Some DB Images, DB Imagelists, Pictures' combos
- ▶ A data navigator, with searching and record moving
- ▶ A data search edit for a duplicating field
- ▶ A data grid with better editing on columns
- ▶ A data combo which can insert a non-existing field
- ▶ Fortes Report automation and images components upgrade
- ▶ Cloned controls' panel
- ▶ Updating your files

There are buttons components too. They optimize and unify the images of the buttons.
