LIBERLOG help some little and middle enterprises to :

- ▶ Make your open software better
- ▶ Homogenize your open software
- ▶ Create quickly a new software
- ▶ Install or customize your Website
- ▶ [Create quickly](#) a multi-platform management software ([VRAD](#))
- ▶ Create quickly some rich management softwares consuming a little resources
- ▶ Document yourself on web tools and methods
- ▶ Help yourself
- ▶ Create some content

For web	PHP and MYSQL so JOOMLA, SPIP, WORDPRESS, etc.
For ready to install softwares	LIBRE OFFICE, OPEN SHOT VIDEOS, FILEZILLA, FLAMEROBIN, ANCESTROMANIA, etc.
For customised software (VRAD)	DELPHI with LAZARUS (Management Framework), JAVA LEONARDI

LIBERLOG Framework

LIBERLOG owns a Management Framework of Very Rapid Application Development. With its Model Driven Architecture of VRAD engine, your software is created with simple passive files containing analysis. The [quality of your software](#) is better too with that.

This framework works on Windows, Mac OSX and Linux.

So your engineer permits to you to pass quickly a stage of software programing from analysis to programing software preparing this stage early. It permits to add only the usefull et getting an interface exactly the same as the analysis.

Behind a standard software with [LIBERLOG framework](#).
